

REGBOX

infobric®

The Regbox is a flexible, entry level solution for electronic time and attendance on any size of construction site. All you need for a complete electronic staff register is a power source, industry recognised smart card and the cloud based service Infobric Ease.

➤ SECURE

- Register attendance with a personal smart card (CSCS, PTS, IPAF or site specific)
- Engineered for the construction environment
- Individual user accounts for authorised staff

➤ SIMPLE

- Quick and easy to install
- Simple administration
- No maintenance

➤ FLEXIBLE

- Scalable to suit all construction sites
- Additional devices and features can be added to meet your requirements
- Once purchased, can be redeployed on site after site

How it works

Mount the Regbox in the desired location. Connect to power supply (110v or 240v), turn on the power and it's ready to use. You now have secure registration of staff arrival and departure from site and a suite of reports to support this.

The Regbox can be used as a fixed registration point, or quickly moved around site if required to support specific works or zones. The unit has a built-in modem and roaming data is provided as part of the package. The unit has been designed to withstand the demanding conditions of any construction environment and will work outdoors (in any weather) as well as indoors.

Easy administration via the cloud based service Infobric Ease

Connect your Regbox to the web service Infobric Ease and you can then monitor and control who is on your construction site. You can log in to the service using your computer, tablet or smart phone and with only a push of a button, produce a full suite of reports for the site. In an emergency, it only takes seconds to produce a roll call for the whole site.

A staff ledger with several possibilities

Easily monitor and control who has access to your construction site, storage containers and site cabins. The peace of mind that only trained and authorised personnel can use MEWPs, hoists and other construction plant. Once you have logged onto Infobric Ease, it is easy to add and activate additional features to increase the safety and efficiency on your construction site. Visit our website to read more about the possibilities Infobric Ease can offer.

Rent or buy your regbox

Choose the solution that suits you best. You can rent your Regbox from one of our delivery partners or buy it directly from us. Mobile data, updates and support are included.

ABOUT INFOBRIC

Infobric develops systems that make the construction site safer and more efficient. With a system from Infobric, you make sure that the right people are in the right place at the right time and have access to the right equipment. We are an official partner of CSCS and IPAF. We develop reliable systems that work, no matter what the scale of the construction site. So much that we have played a key role in thousands of construction sites for over 10 years and currently have over 9,000 live projects throughout Europe the UK and Ireland.
